SUPERWOMAN S1

AVAILABILITY

Seed

Parent Strains: Superwoman x Superwoman

Cannabinoid Profile: CBD Dominant Hybrid

Potential CBD:THC Ratio: 30:1

*Pre-Harvest CBD: 7.8%, THC: 0.16%

***Post-Harvest CBD:** 17.9%, THC: 0.6%

Aroma: A cheesy funk of sweet cherries and garlic pepper.

Flavors: A garlicky profile of grenadine covered cherries and parmesan cheese.

Appearance: A complex profile of 50 shades of green intertwined with a light to dark series of orange pistils.

Backstory of Strain: A refined and stable series of self pollinations and back crosses made this balanced high performing cultivar. A reliable strain with a track record since 2017.

Size & Style: A balanced hybrid designed for it's unique ability to thrive in multiple climates, gives this consistent cultivar the ability to out yield and perform some of the best genetics in hemp. A true darkhorse.

FEMINIZED: YES

GERMINATION RATE: 99%

TIME TO HARVEST: 8-9 WEEKS

AVAILABILITY

Parent Strains: Auto Magik x Auto Magik

Cannabinoid Profile: CBD Dominant Auto Flower

Potential CBD:THC Ratio: 20-25:1

CBD Content: 6%-10%

Aroma: Skunky yet fruity, high in myrcene and pinene.

Flavors: A surprisingly gasoline dominant flavor with a sweet fruit aftertone.

Appearance: Green and purple phenotypes with large expansive flowers.

Backstory of Strain: Our pick for terpene extraction, great for smoking raw and designed optimal yield in a 80 day

Size & Style: A mature plant can hit 3 1/2 feet tall and 3 ft wide with dense colas. This cultivar has several phenotypes.

FEMINIZED: YES

GERMINATION RATE: 99%

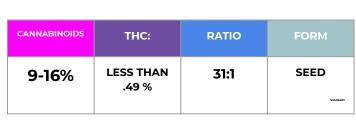

TIME TO HARVEST: Auto

CHERRY SUNRISE

AVAILABILITY

Seed

Parent Strains: Early Bird S3 x Original Cherry S3

Cannabinoid Profile: CBD-Dominant Hybrid

Potential CBD:THC Ratio: 31:1

*Pre-Harvest CBD: 9.2%, THC: 0.2%

*Post-Harvest CBD: 15.1%, THC: 0.49%

Aroma: Sweet pine and cherry citrus with a smokey salmon edge.

Flavors: An earthy sweetness of molasses and maraschino cherries mixed with a smokey and dark roast.

Appearance: Dark green bud structure with a yellow and black fade at the end of the flower cycle. A large yielder and vigorous plant that's easy to grow.

Backstory of Strain: This plant was created to give people an easy to grow/maintain cultivar that has tremendous vigor & great yield potential. With lineage from CO & OR, this cultivar grows well in many climates.

Size & Style: A fast growing hybrid that demands space and attention. She can be 8+ feet at full maturity. She has large fan leaves & uniform characteristics ideal for outdoor or greenhouse.

CBGAMBIT

CANNABINOIDS	THC:	RATIO	FORM	
8-15%	LESS THAN	36:1	SEED	
AVAILABILITY				

Seed

Parent Strains: Cannaropa Spain CBG x Unknown CBG

Cannabinoid Profile: CBG Dominant Hybrid

Potential CBG:THC Ratio: 36:1

*Pre-Harvest CBG: 8.3%, THC: .07%

*Post-Harvest CBG: 14.7%, THC: 0.1%

Aroma: A mild blend of freshly harvested microgreens with an array of plant matter, black pepper, and pine nuts.

Flavors: A moderate terpene content variety that offers a smooth and satisfying earthy tone.

Appearance: Cloudy trichomes that looks like a spoiled vanilla milkshake that has a dense bud structure to produce fine quality flowers for smokable and CBG extracts.

Backstory of Strain: A unique CBG variety that has great vigor, resistance to mites, and some terpene expression. Levels of CBDa and CBCa will also appear in minor levels for certain phenotypes.

Size & Style: A vigorous and fast growing plant with 5 point fan leaves and medium intermodal spacing. She grows more vertical than horizontal, but has great uniformity.

KIFCURE

APOLLO

CANNABINOIDS	THC:	RATIO	FORM
8-14%	LESS THAN .26	30:1	SEED

SEED

GROW CHARACTERISTICS

Known for resistance to a whole assortment of pests, molds and mildews as well as frost and cold weather, Apollo is hardy and fairly rich in terpenes which increases pest resistance. Clocking in between 7-10% CBD with tolerably low levels of THC.

APPEARANCE AND TASTE

Spicy, peppery and fruity in both taste and smell, Apollo is a lighter green flower with deep magenta dappled throughout. Light in strength and intensity, Apollo is a relaxed and mellow strain.

FEMINIZED: YES

GERMINATION RATE: 96%

TIME TO HARVEST: 8 WEEKS

KÍFCURE

EIGHTY EIGHT

CANNABINOIDS	THC:	RATIO	FORM
7-13%	LESS THAN .3%	28:1	SEED

AVAILABLE AS

SEED

GROW CHARACTERISTICS

Known for resistance to a whole assortment of pests, molds and mildews as well as frost and cold weather, Eighty Eight is hardy and fairly rich in terpenes which increases pest resistance. 6-9% CBD.

APPEARANCE AND TASTE

Earthy, honey-like aroma on verdant gold laced buds, grow dense and resinous on a medium height plant.

FEMINIZED: YES

GERMINATION RATE: 98%

TIME TO HARVEST: 8 WEEKS

PURPLE EMPEROR

AVAILABLE AS

SEED

GROW CHARACTERISTICS

Purple Emperor produces shorter heartier plants that are rapid rooting, hearty, tolerant of mild frost and hard or clay soil. High terpenes repel pests. Somewhat frost tolerant.

APPEARANCE AND TASTE

Sweet citrus flavors and a floral aroma make these dense purple buds look delectable. With incredible presentation and flavor suitable for smokeable flower the emperor is a low CBD, easy, flavorful all-day smoker.

FUTURA 83

FIBER FIRST

SUMMARY

FIBER TONS. PER ACRE % FIBER: HEIGHT GRAIN 5.5 29.3% 12ft 900/acre

AVAILABILITY

Seed

Purpose: Fiber

DESCRIPTION

A new variety introduced in 2021, Futura 83 has a late-flowering cycle that makes it ideal for biomass production. The plant finds its home in southern latitudes where higher levels of humidity are found. Futura 83 brings heavy fiber yields with long straight stalks reaching between 8-12 ft. tall.

PROFILE

CBD: 2-3

THC: <.12

GRAIN FIRST

FIBER TONS PER ACRE	% FIBER:	HEIGHT	GRAIN
3.5	28.3%	6.5 ft	1300/acre

SUMMARY

AVAILABILITY

Seed

Purpose: Grain

DESCRIPTION

Earlina 8FC is bred for seed production and is one the earliest grain varieties to mature. Large yields of seed can be expected with over 30% oil and 25% protein, along with moderate levels of CBD. Best suited for climates with lower levels of humidity and shorter growing zones.

PROFILE

CBD: 2-3

THC: <.12

FEDORA 17

DUAL FIBER & GRAIN

FIBER TONS PER ACRE	% FIBER:	HEIGHT	GRAIN
4.5	27.3%	8.25 ft	900/acre

SUMMARY

AVAILABILITY

Seed

Purpose: Dual

DESCRIPTION

One of the favorites of European growers, this variety is becoming a fast favorite in America. When grown as a dual crop Fédora 17 produces impressive seed yields while maintaining fair levels of fiber content. Southern latitudes can expect only a seed harvest with above average CBD levels. Fédora 17 is able to acclimatize to different climates while maturing on the early side. Seeds contain 30% oil and 60% Omega 6.

PROFILE

CBD: 1.5-2

THC: <.12
