Low Cost, High Impact: The Key to Sustainability

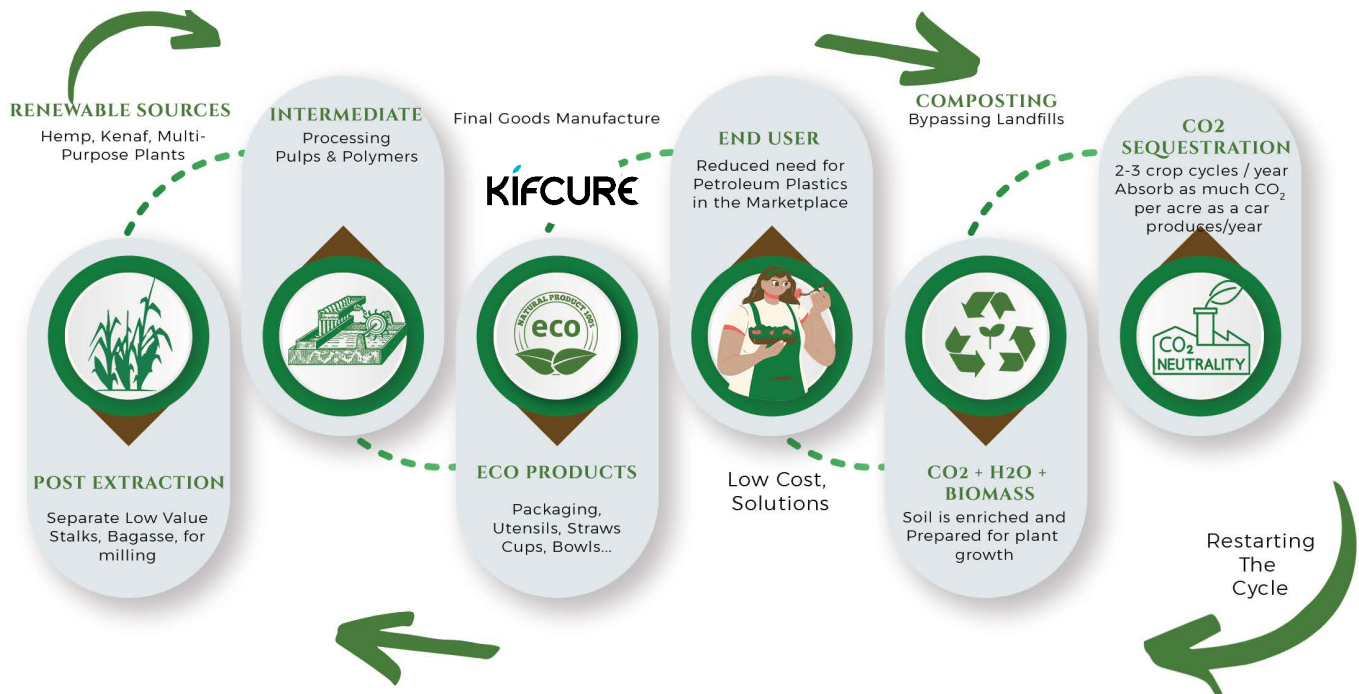

“Be part of the solution”

#1 Most Common Question: **Why is using plant-based compostables important?**

Answer: Because kicking the can for the next generation doesn't even make cents \$\$ (or sense, for that matter).

#2 Most Common Question: **Is Hemp = Marijuana?**

Answer: NO. Hemp is the fibrous, nonpsychoactive sibling plant that is commonly used for rope, clothing, etc.

UPCYCLE LIFESTYLE

They say there's nothing new under the sun, so reusing what we have is in tune with the universe, and that's a rhythm we jam to. Products like hemp straws and utensils are our clever way of reducing the production of unnecessary plastics tied to eating on the go. Made from leftover plant matter and moisture-resistant boibased coatings, its journey from seed to shelf is one worth repeating, over and over and over...

LESS CO₂ MORE COMPOST

Plant fibers are often burned after harvest, releasing GreenHouse Gases and furthering climate change. Kifcure utilizes these materials to make naturally colored compostables, avoiding confusion with traditional plastics**

*When tested in an aerated compost with common, active microbes
 **Most Compost Centers turn down other biodegradable utensils because they are hard to differentiate from petroleum plastics, which never degrade.

RESTAURANT TO-GO

- ✔ Kifcure is a Domestic Leader in Single use Hemp Pulp and Biopolymer Supplies
- ✔ Soil/Home compostable options, 100% bio-based
- ✔ Ability to deliver custom options to meet any demand

UNIQUE PLANT FIBER-MADE ALTERNATIVES

HEMP UTENSILS

Perfect for on-the-go meals and restaurant takeout, these aesthetically pleasing disposables stand out as best-in-class for eco-friendliness, price, and performance. Even better, you can wash and reuse these for multiple uses, with proven soil compostability.

KNOW THE GREEN DIFFERENCE

Don't be fooled by Greenwashing competitors - Many products "Made from Plants" are not compostable, and industrially compostable means if it doesn't reach a special facility, it can last as long as regular plastic. Hemptensils are one of the only options made from a Home Compostable plant-based material certified by TUV Austria, that still perform to expectation.

PACKAGING OPTIONS:

Retail	Bulk	Sealed Combo Kits
120Count	1000/Case	250/Case, Custom Logo Printing MOQ=5000
 HAZELNUT	 BLACK	
Weight 3.5g -5g	Material	
Length 5.5" - 7.5"	Hemp, Plant Stover and Resin Blend	

HEMP STRAWS

The first true compostable straw made from food safe Hemp. This noteworthy item is fit for Eco Royalty. Designed for disposal or organic recycling, these compostable straws are reusable in a pinch, and won't fall apart in the middle of drinking like paper straws.

1mm Thickness Walls
100% Petroleum Free
Hemp, Bagasse, and Resin Blend

PACKAGING OPTIONS:

Retail	Bulk 12" Case	Individually Wrapped
100, 500 Ct	2000ct Case	2000ct Case
Weight 1g		
Options	Standard 7.5"; Boba 10", Cocktail 5" Individually Wrapped, Custom Logo Print (MOQ=50k units)	
Diameter	Standard(8mm) Boba(12mm) Cocktail(4mm)	

CODE	DESCRIPTION	Flash Freeze -40°F	Freezer -15 to -18°F	Refrigerator 33 to 47°F	Room Temp 72°F	Edible Range 120 to 160°F	Microwave Range 180 to 250°F

ORDER DIMENSIONS

Paper straws are for the birds (at the very least, since we are cutting down trees to make them...) and around here, we #ThinkDifferent. Hemp straws are the best option on the market: Ultra-sustainable, CO₂ consuming stalks of hemp make for the lowest cost compostable straws that allow you to enjoy your drink while actively healing the environment.

HEMP UTENCILS ORDER SHEET

Sometimes using a single-use utensil is unavoidable... so go sustainable and transform your brand with the best plant-based option on the market -- hemp utensils. Domestically grown and manufactured hemp stalks are pressed into heat resistant utensils that don't require special facilities to safely biodegrade. Designed to handle a snack or a steakhouse, these low-cost plastic alternatives will have your customers thanking you for being an environmental advocate in your community.

HEMP BAGS

FROM 100% PURE HEMP MACHINE-MADE PAPER

PRODUCT FEATURES

RENEWABLE

One acre of Hemp can produce as much paper as 4-10 acres of trees over a 20-year cycle, and hemp doesn't need pesticides or herbicides.

HIGHER CELLULOSE CONTENT

Trees are made up of only 30% cellulose, requiring the use of toxic chemicals to remove the other 70%. Hemp, on the other hand, can have up to 85% cellulose content.

LOWER LIGNIN CONTENT

Hemp has lower lignin content than wood. Hemp contains 5-24% lignin whereas wood has 20-35%. This is advantageous as lignin must be removed from the pulp before it can be processed as paper.

DURABLE

Hemp paper is more durable than trees and does not yellow, crack, or deteriorate like tree paper. It is also one of the strongest natural fibers in the world, one of the reasons for its longevity and durability.

NON-TOXIC WHITENING

Hemp paper does not require the use of toxic bleaching or as many chemicals as wood pulp because it can be whitened with hydrogen peroxide which is consumed in the process.

RECYCLABLE

Hemp paper can be recycled up to 8 times, compared to just 3 times for paper made from wood pulp. It is also compostable and biodegradable.

MORE STRETCH

100% machine made hemp paper produced by Cottrell has more stretch built into it in both directions allowing it to be folded without the risk of cracking. This special process also greatly increases the ability of the paper to absorb energy without breaking when stressed.

100% Hemp Paper Bags

Paper Weight: 40 lb

Size: (3" x 5" x 10")

Unprinted or Printed

Printing: 1- 4 colors | 1 or 2 sides

Quantities Available:

1000 | 5000 | 10000 | 25000 | 100000

THE MISSION: BREAK FREE FROM PLASTIC

CONSIDER THE SOURCE

It's *past* time for change. We all know 90% of plastic isn't recycled, and will take centuries to degrade. With over 8 Billion tons of petroleum waste produced per year (much of it ending up in the ocean), recycling just isn't enough. It is on us to stem the problem at the source--and provide the path to cost effective, plant-based alternatives.

Building Circular Economies depends on the full use of our resources. With the resurgence of industrial Hemp, the post harvest crop remnants become an opportunity for farmers and consumers alike. By using the stalks, leaves and bagasse left after high value seeds, oils and flowers are extracted, we can develop a plethora of low-cost, eco-friendly goods consumers will love. Better still, we can avoid these materials being burned or sent to landfills. This eliminates *millions* of tons of CO₂ from the atmosphere annually, and reduces the need for petroleum plastics.

Made from USDA Biobased approved blends of Biomass, fermented sugars, and enzymes, our home compostable alternatives bring the product lifecycle to the forefront of the conversation. When properly disposed of, they will degrade into food for soil bacteria in as little as 6 months.

Bringing Kifcure Hemp Products into your business lets your customers, friends, and family know that you are committed to being a force for good. ***"The Best Time to Plant a Tree is 20 years ago. The Second Best Time is Now."***
